A six-state network leveraging the power of institutions to TRANSFORM OUR FOOD SYSTEM
Farm to Institution New England (FINE) is a six-state network of nonprofit, public and private entities working together to transform our food system by increasing the amount of good, local food served in our region’s schools, hospitals, colleges, correctional facilities, and other institutions.

**Goal 1:** More regional food served at institutions

**Goal 2:** More developed and diverse regional network of individuals and entities across all parts of the food system that are mobilizing the power of institutions to transform the food system

**Goal 3:** Broader stakeholder understanding of the role of farm to institution

**Goal 4:** Stronger state and federal policies in support of farm to institution

**Goal 5:** Stronger organizational foundation to support FINE’s mission-driven work

FINE connects and informs people along the supply chain, and across sectors of the food system.

We envision an equitable and just food system that provides access to healthy and abundant food for all New Englanders, and is defined by sustainable and productive land and ocean ecosystems.
