OUR MISSION
To mobilize the power of New England institutions to transform our food system

OUR VISION
By 2030, we envision New England institutions and the FINE network playing leadership roles in cultivating a region that is moving towards self-reliance.

We envision an equitable and just food system that provides access to healthy and abundant food for all New Englanders, and is defined by sustainable and productive land and ocean ecosystems.

OUR VALUES
We value collaboration, community and place, diversity, equity, healthy ecosystems, strategic disruption, the right to food, thriving local economies, and transparency.
**CORE STRATEGIES**

**Network**
We serve as the backbone for the farm to institution network in New England.

**Catalyze**
We catalyze projects that address key barriers in the food supply chain.

**Organize**
We organize communities of practice to increase rates of success.

---

**REGIONAL NETWORK**

Farm to Institution New England is a six-state network of nonprofit, public and private entities working together to transform our food system by increasing the amount of good, local food served in our region’s schools, hospitals, colleges, prisons, and other institutions.
